To Whom It May Concern:

It is without reservation that I recommend Lauren Huntington for this position. Consistently throughout her education and residency, Lauren demonstrated her ability to relate to her students in a positive, effective, and nurturing manner. Her students respect her and look to her for guidance. The excellent rapport Lauren has with her students is translated into effort by her students during class. Her students know that even though they may not fully understand a concept, she will work with them one on one to differentiate her instruction for each student until they understand.

Lauren has a very strong science background and her pedagogical content knowledge exceeds teachers that have several years of experience. She is well-organized, plans her lessons around real world situations and helps her students see the connections between the concept learned in class and how it will apply to them in the future. Her positive attitude is contagious and it is nice to see that she actually smiles at her students as she engages with them. In addition, Lauren integrates technology into every lesson effectively and flawlessly. She is able to utilize diverse applications that make her lesson objectives attainable by her students.

In addition to her content knowledge and skills in the classroom, Lauren is a natural leader and an articulate communicator. Lauren offers a set of skills that will truly enhance your school and meet the needs of your students. She is intelligent, eloquent, dedicated to education and a hard worker. She will exceed all expectations of her. I highly recommend Lauren Huntington.

Sincerely,

A handwritten signature in black ink, appearing to read "Jason Katzmann".
